SKILLS

- **Programming:** Python, R, Java, JavaScript, C++
- **Data Analytics:** Pandas, NumPy, Seaborn, Matplotlib, Plotly, DataBricks
- **Visualization Tools:** Tableau, Power BI
- **Databases:** SQL, MySQL, NoSQL, Snowflake
- **Additional Tools:** Git, VS Code, SAS, Excel (Advanced Functions)

EXPERIENCE

GrrowUp, Noida(Remote) - *Data Analytics Intern*

May 2024 - Aug 2024 (3 Months)

- Cleaned and analyzed datasets using Python and SQL, ensuring data accuracy for predictive modeling.
- Designed and deployed interactive dashboards in Tableau, enabling stakeholders to make informed decisions.
- Identified key trends and provided actionable insights to enhance operational efficiency.

EDUCATION

Vellore Institute of Technology, Vellore, IN

2022 - 2024

Master of Computer Application (MCA) : CGPA: 8.20/10

Relevant Coursework: Soft Computing, Big Data, Cloud Computing

B S Abdur Rahman University of Science and Technology, Chennai, IN

2019 - 2022

Bachelor of Computer Application (BCA) : CGPA: 8.01/10

Relevant Coursework: Multimedia, Web Application Development

PROJECTS

Fitbit Consumer Behavior Analysis Dashboard using Tableau. [08/2024]

- Cleaned and explored large Fitbit datasets, uncovering key consumer trends.
- Built an interactive Tableau dashboard to visualize behavior patterns and support marketing strategies.

Interactive Air Quality Analysis Dashboard using Tableau. [07/2024]

- Designed and built a Tableau dashboard to visually present data insights and key findings from the provided dataset.
- Created an interactive and informative dashboard that effectively communicates the story within the data.

Indian Cars: Data Analysis and Visualization using SQL and Python. [07/2024]

- Identified that the top 25 selling car models constituted over 75% of total sales in April 2023.
- Visualized key insights through histograms, bar charts, scatter plots, and heat maps to understand the distribution and relationships between variables.

World Bank Data using Python and Plotly for Visualization. [06/2024]

- Analyzed global fertility and life expectancy data from 1960-2016.
- Created animated graphs using Python's Plotly library, presenting insights into socioeconomic trends.

CERTIFICATION

- Google Analytics Certification - **Google**
- AWS Cloud Technical Essentials - **Coursera**
- Database and SQL for Data Science with Python - **IBM**
- Introduction to Data Analysis - **IBM**
- AI for All: From Basics to GenAI Practice - **Nvidia**
- Python Programming - **Preplnsta**
- Java Programming - **Preplnsta**
- Basic Coding - **Preplnsta**
- Problem Solving (Basic) - **HackerRank**
